

Three key areas unfold north-south along the Jingzhang heritage corridor.
Left: full-corridor phasing. Right: key-area enlargements (concept only).

Source: geometry/site_boundary.geojson, key_areas.geojson - v3 - provisional, not an official redline

Submission Snapshot	
Site area (provisional)	11.41 km²
Key areas	3
Green ratio (recalc)	49.7 %
Public space ratio (recalc)	6.4 %
Phasing	2026-2028 / 2028-2030 / 2030-2035
FAR	unknown (pending formal controls)

R&D-led mix with a continuous park spine and residential/commercial supporting zones; seven zones placed within the provisional boundary.

Source: geometry/land_use.geojson - v3 - [standard:MNR-LAND-USE-CLASSIFICATION-GUIDE]

Enlargements show proposed R&D/incubator/cultural buildings interwoven with retained fabric, linked by plazas and courtyards. Massing is indicative.

Jingzhang AI Spine - A Century Railway's AI Future

Metrics Evidence Dashboard

All values recomputed from GeoJSON - EPSG:4548 projected areas

Concept - Provisional

All metrics recomputed on PROVISIONAL boundary geometry (EPSG:4548); full recalculation required once the official SITE_BOUNDARY is released

Site Area

11.41 km²

[data:geometry/site_boundary.geojson]

Key Areas

3

[data:geometry/key_areas.geojson]

Land Use Zones

7

[data:geometry/land_use.geojson]

Buildings

14

Method & Definitions

- Areas are projected-plane (EPSG:4548) geometric recomputations, not cadastral

- Green ratio = union(green)/site area; public space ratio likewise

- Building footprint = union of footprints; no FAR inference involved

- FAR kept unknown: no formal regulatory ceiling available

Data Gaps & Recalculation Commitment

- Official redline & key-area polygons unpublished; current geometry is provisional

- Upon release: boundary, key areas, land use, roads, green, public space, buildings, phasing and ALL dependent metrics will be recomputed and this board updated

- Insufficient cadastration/utility/heritage data - no engineering conclusions implied

v3 - all metrics recomputed EPSG:4548 - FAR pending - [source:SITE-PACKAGE]

Every metric is recomputed from GeoJSON in EPSG:4548 - reproducible and auditable. FAR remains pending absent formal controls.

v3 - all metrics recomputed EPSG:4548 - FAR pending - [source:SITE-PACKAGE]
